

HARPETH VALLEY UTILITIES DISTRICT PROPOSED I-40 FORCE MAIN

WHAT

Harpeth Valley needs to install approximately three miles of pipeline along the sections of the Harpeth River, George E Horn Road and Interstate 40.

WHY

The pipeline will increase the capacity and reliability of the District's wastewater collection system. The capacity is needed to accommodate the growth and redevelopment of Bellevue. The additional reliability is needed to reduce the risk of failure of aging infrastructure.

WHAT CAN I EXPECT

Local traffic detours or lane closures, however traffic will not be impacted where the pipeline crosses Highway 70 or Interstate 40. The District and the contractor will minimize local traffic impact wherever possible.

WHEN

Construction is anticipated to begin late fall 2019. Construction should last nine to twelve months.

CONTACT

Contact Tatiana Smith at (615) 352-7076 with HVUD for more information. For concerns specific to construction, please contact the Cleary Construction, Inc. hotline at (800) 972-1823.
